

OVERVIEW

Sustainability has become a critical focus for organisations, the governments are taking it seriously by continuously enhancing legal standards to ensure sustainability becomes a priority. Consequently, it is increasingly important for the organisations to thrive in a responsible and future-proof manner, prioritising sustainability but most of them face challenges during their digitalisation journey. Enter KewSustain, our groundbreaking sustainability management platform designed to revolutionise the way you navigate the complex landscape of sustainability and keep you compliant with sustainability standards at all time. KewSustain empowers organisations to achieve sustainable excellence while fostering a culture of sustainability across all levels.

Key Features

- Automated & flexible data collection
- Trustworthy and auditable data management process
- High scalability to comply with new standards
- Real-time Analytics & Submission Ready Sustainability Report with advanced intelligence capabilities
- Foster a sustainability culture within the organisation – everyone in the organisation matters
- Real-time communication across different departments

KEY FEATURES & BENEFITS

Automated & flexible data collection

- Offers a range of data collection methods to suit organisations' needs
- Automated data integration with systems like ERP and HR that easily collect data without manual intervention
- Real-time sensors provide up-to-the-minute data sync on energy usage, waste management, and more.
- Allows human collaborators like the facility managers to manually upload data through Excel

Trustworthy and auditable data to optimise sustainability management process

- Collects structured and unstructured data from all data points related to sustainability
- Centralising and syncing all sustainability material and data to produce actionable insights

Key Benefits

- Optimise sustainability management process with intelligent data collection and trustworthy data
- Ensure continuous compliance with legal standards even new standards
- Enhance operational efficiency with real-time analytics & submission ready reporting and real-time communication across different departments
- Optimise sustainability performance by fostering a culture that everyone in the organisation matters

- Robust data processing and calculating to ensure data collected data is trustable and auditable
- Partner with a leading blockchain technology provider, Dedoco, to provide an immutable record of sustainability data, ensuring data accuracy and transparency
- Ensures that data is accurate and up-to-date, eliminating the need for manual data entry and reducing errors.

High scalability to comply with new standards

- Supports continuous compliance with global sustainability standards (such as SASB, GRI, TCFD and stock exchanges (such as Bursa Malaysia and SGX) listing requirements
- Adapts to changes in regulations and standards, ensuring that the organisation remains compliance.
- Generate sustainability results that can be compared with ESG raters' guidelines, such as FTSE4Good, MSCI, DJ and S&P.

Real-time Analytics & Submission Ready Sustainability Report

- Automate GHG Emission calculation
- Provides a bird's eye view with a comprehensive dashboard of the organisation's sustainability performance
- Offers easy-to-understand analytics that can be performed in just a few clicks.
- Apply advanced intelligence capabilities that enable detailed analysis (e.g., peer analysis, simulated analysis, and scenario planning), identify risks areas in Policy and legal risk, Technology risk and more, and enable discovery of opportunities across different departments.
- Generates submission-ready sustainability reports, saving time and effort in reporting.

Foster a sustainability culture within the organisation – everyone in the organisation matters

- Provides a bottom-up approach towards sustainability, empowering all employees to contribute to sustainability performance.
- Increases awareness of the importance of sustainability across the organisation.
- Encourages employees at all levels to adopt and practice sustainable behaviours through incentives and rewards mechanisms.
- Enable measurements of employee's contributions to Sustainability

Real-time communication across different departments

- Creates a culture of transparency and accountability, enabling departments to share data and insights.
- Reduces communication gaps between departments to collect or share data, improving decision-making and collaboration.
- Enables real-time communication, ensuring that all stakeholders have access to the latest sustainability information
